**Forecast for Sunday 28 May 2023**

**Weather:** Early high cloud, along with some mist and fog patches possible in valleys. This breaking and clearing through the morning to warm sunshine, but feeling cooler on the tops with a brisk breeze developing.

**Chance of cloud-free hill tops above 800m:** Near 100%

**Low Cloud and visibility:** Mist and fog patches early morning could limit visibility at low levels for a time but son clearing. Most hills will be clear with cloud above the tops, giving very good views of distant peaks.

| **Valley** | 13/12 | 12/10 | 11/9 | 13/10 | 17/11 | 19/12 | 16/12 | 12/11 | 11/8 |
| **Freezing Level*** | 2200m | 1900m | 1700m | 1400m | 1300m | 1400m | 1600m | 1700m | 1700m |

**Level above which ground is expected to be frozen/snow is expected to settle.*

**Meteorologist's View**

Strong sunshine with high UV levels and appropriate protection required. Despite the fine weather, it will still be worth packing a warmer layer or two for when on the tops and exposed to the breeze.

**Forecast for Monday 29 May 2023**

**Weather:** Perhaps the odd patch of valley mist or fog during the morning. This soon clearing, however high cloud will thicken from the northeast through the morning. This will break through the day, however any sunshine is likely to remain rather hazy. Also turning rather breezy, and feeling rather cool.

**Maximum wind:** Easterly 15-20mph with gusts 25-35mph

**Chance of cloud-free hill tops above 800m:** Near 100%

**Low Cloud and visibility:** Fog or mist patches possible at first, limiting views from lower levels. This soon clearing, however and with daytime cloud remaining well above the tops some very good views can expected.

**Temperature:** **Valleys:** Plus 5 Celsius rising to Plus 17 Celsius
**At 800m:** Plus 3 Celsius rising to Plus 10 Celsius
**Freezing level:** Above summits.
